

The Cold War Returns

15/3/18

Both Prime Minister expelled diplomats.

The prime minister Theresa May has expulsion of 23 Russian diplomats after the chemical attack in Salisbury on Sunday which involved a nerve agent and has left three people in intensive care.

Russia has said that they will expel UK diplomats "soon". Also Sergei Lavrov a Russian diplomat spoke to the Russian media about the expulsions saying they would "definitely" happen.

The UK took this action after Moscow would not explain how a Russian-made nerve agent was used on a former spy and his daughter. They are at this very moment fighting for their lives in intensive care.

Boris Johnson, the foreign secretary said it was 99.7% certain that it was the Russians who organised the criminal act on British soil. He said that the nerve agent was created by Russia and was given to a Russian "traitor" who Putin had avowed to poison.

The English is hoping to get more support from europe because they think that the situation will get worse.
